Version 02.25.2009

# 1. Before You Start

#### Package Contents

Ÿ TBW-106UB Ÿ Utility& Driver CD-ROM Ÿ Multi-Language Quick Installation

### **System Requirements**

ŸCD-ROM drive ŸUSB Port: 2.0 or 1.1

ÿ CPU: 600MHz or Above / 800MHz or Above (Windows Vista) ÿ Memory: 256MB or Above / 512MB RAM or Above (Windows Vista)

ŸHard Drive Space: 50MB or Above

Ÿ Windows 2000/XP/Vista

#### **Application**

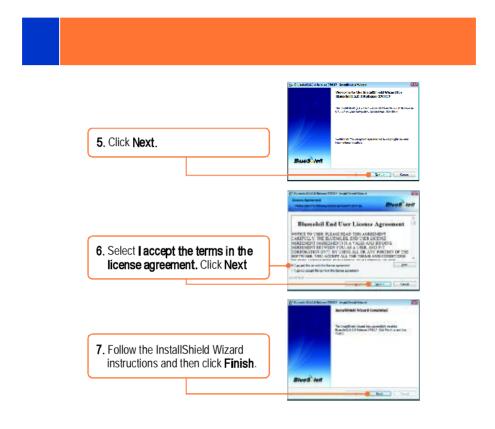

\* Backwards compatible with USB 1.1 at 12Mbps

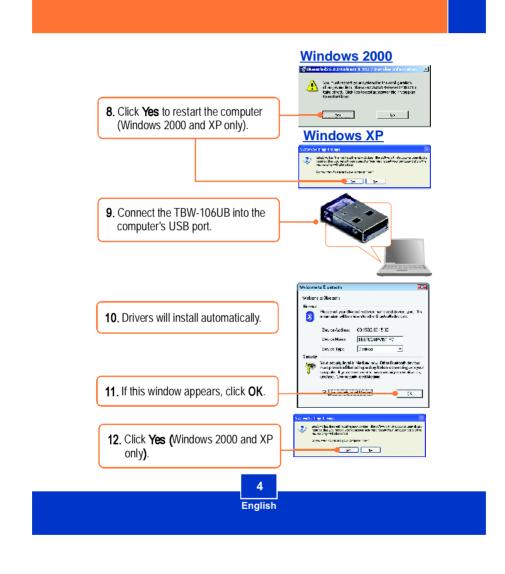

### 2. How to Install

#### Note:

- 1. Do not insert the TBW-106UB USB adapter until instructed to do so.
- If you have any Bluetooth driver (software) previously installed on your computer or built-in Bluetooth device, please remove the driver and disable the built-in Bluetooth device first.

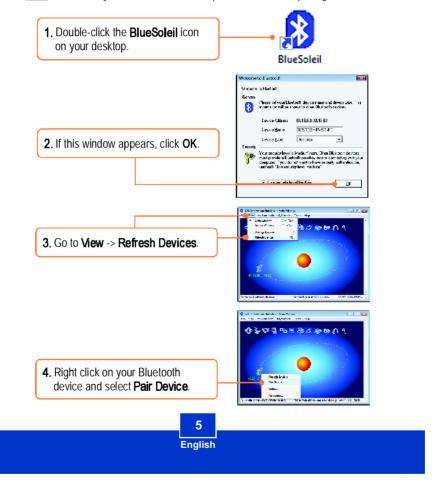

# 3. Configuring the Bluetooth Adapter

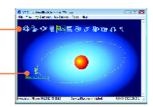

**Note**: Make sure your Bluetooth device is powered on and in pairing mode.

5. Type in a Passkey (for example: 0000. Please consult your Bluetooth device's manual for more information) and then click OK. Then put in the same Passkey on your Bluetooth device.

**6.** Double left-click on your Bluetooth device to show the available services. The available services will appear in yellow.

### Your configuration is now complete.
